

ABDUL SESAY

Abdul Sesay's career path paints a vivid picture of tenacity, continuous learning and mentorship. Abdul joined Southern as an M4 service technician at the Parliaments in 2001. Fueled by ambition and his enriching experience at Southern's Maintenance Training Academy, Abdul adeptly grew through the ranks. In a remarkable span of just five years, he progressed to M3, then M2 and finally to M1 assistant service manager.

In July 2006, Abdul began a new chapter in his career, stepping into the service manager role at Kings Gardens. But his journey didn't stop there. By January 2009, he embraced the specialized roles of HVAC and electrical technician. A year later, Abdul took his expertise to the Corporate team, first as an MTA instructor and then as the lead MTA instructor.

Seizing opportunities has always been Abdul's way. So, when a field advisor position opened in August 2016, he applied, got the job and served the Tri-County cluster before transitioning to oversee the Virginia cluster and commercial properties. In January 2023, Abdul's skills and dedication were recognized with another promotion, this time to physical asset services manager.

Throughout his tenure at Southern, Abdul has been both a learner and a mentor. While he has accumulated a vast reservoir of knowledge, he also generously shares all he knows and positively impacts countless team members. We couldn't be more grateful for Abdul's commitment and expertise and the transformative power of his mentorship.
